

Federal Law Alerts – February to March 15th

CDC Guidance for Fully Vaccinated

On March 8, 2021, the Centers for Disease Control and Prevention (CDC) released its first [Interim Public Health Recommendations for Fully Vaccinated People](#) guidance under which fully vaccinated people can:

- Visit with other fully vaccinated people indoors without wearing masks or physical distancing.
- Visit with unvaccinated people from a single household who are at low risk for severe COVID-19 disease indoors without wearing masks or physical distancing.
- Refrain from quarantine and testing following a known exposure if asymptomatic.

However, the CDC recommends that fully vaccinated people should continue to:

- Take precautions in public like wearing a well-fitted mask and physical distancing.
- Wear masks, practice physical distancing, and adhere to other prevention measures when visiting with unvaccinated people who are at increased risk for severe COVID-19 disease, including household members.
- Wear masks, maintain physical distance, and practice other prevention measures when visiting with unvaccinated people from multiple households.
- Avoid medium- and large-sized in-person gatherings.
- Get tested if experiencing COVID-19 symptoms.
- Follow guidance issued by individual employers.
- Follow CDC and health department travel requirements and recommendations.
